Strategies to Solve Wordle Puzzles

To improve success rates in Wordle, understanding and applying effective strategies is essential. The Wordle answer July 12 provides an excellent case study for such tactics. Starting with Common Letters

One of the most recommended strategies involves starting with words that include frequently used vowels and consonants. Letters such as E, A, R, I, O, T, N, and S are statistically more likely to appear in the daily Wordle answer. For the July 12 puzzle, beginning guesses that included these letters increased the chances of quickly narrowing down the correct word.

Elimination Process

Wordle encourages players to use an elimination process whereby incorrect letters are systematically ruled out based on feedback from each guess. Identifying which letters do not appear in the answer is as important as confirming the correct ones. The feedback colors (green, yellow, gray) guide players in refining their guesses, which was especially effective for the July 12 answer “PLANE.”

Using Letter Positioning

Another critical strategy is focusing on letter positioning. When a letter is confirmed to be in the word but in the wrong place (yellow), players should experiment with different positions.
