Both are explored with the objective of identifying gender similarities and differences on the effects of physical appearance. words for physical appearance: The Flesh Made Word Helena Michie, 1987-03-12 Helena Michie's provocative new work looks at how women's bodies are portrayed in a variety of Victorian literary and non-literary genres--from painting, poems, and novels, to etiquette, books, sex manuals, and pornography. After identifying a series of codes and taboos that govern the depiction of women in such activities as eating and working, she then turns to the physical descriptions of Victorian heroines, focusing on those parts of their bodies that are erased, and on those that become fetishized in conventional description. Her vivid analysis moves forward in time with a consideration of 20th-century second wave feminism and a discussion of the poetics of the body as articulated by feminist writers on both sides of the Atlantic. Making use of feminist, poststructuralist, and psychoanalytic accounts of the figure of woman, and the relation of the body to the text, *The Flesh Made Word* offers fresh readings of works by writers as diverse as the Brontës, Dickens, Eliot, Gaskell, Trollope, Hardy, Adrienne Rich, Olga Broumas, Audre Lorde, and Louise Glück.

words for physical appearance: Phenomenology to the Letter Philippe P. Haensler, Kristina Mendicino, Rochelle Tobias, 2020-11-23 Regarding philosophical importance, Edmund Husserl is arguably the German export of the early twentieth century. In the wake of the linguistic turn(s) of the humanities, however, his claim to return to the Sachen selbst became metonymic for the neglect of language in Western philosophy. This view has been particularly influential in post-structural literary theory, which has never ceased to attack the supposed logophobia of phenomenology. Phenomenology to the Letter. Husserl and Literature challenges this verdict regarding the poetological and logical implications of Husserl's work through a thorough re-examination of his writing in the context of literary theory, classical rhetoric, and modern art. At issue is an approach to phenomenology and literature that does not merely coordinate the two discourses but explores their mutual implication. Contributions to the volume attend to the interplay between phenomenology and literature (both fiction and poetry), experience and language, as well as images and embodiment. The volume is the first of its kind to chart a phenomenological approach to literature and literary approach to phenomenology. As such it stands poised to make a novel contribution to literary studies and philosophy.

words for physical appearance: Feminism Confronts Homo Economicus Martha Fineman, Terence Dougherty, 2018-08-06 The essays in this volume confront the inroads that economics has made into the legal academy.... Law and Economics uses principles of neoclassical economics to develop laws and social policies that maintain if not bolster current allocations of power.—from the Introduction The Law and Economics school has had a significant impact on the legal and

governmental landscape in the United States. It posits a perfectly rational economic man—homo economicus—who is unconstrained by familial and communal ties and who can and should make decisions solely in light of considerations of economic value. *Feminism Confronts Homo Economicus* offers a major intervention in debates about how law has come under the influence of economic principles. Drawing on the latest thinking in the fields of feminist legal theory, critical legal studies, and feminist economics, the essays critique the notion that legal and policy decisions should be made solely through the lens of economics. While the contributors question the wholesale incorporation of the neoclassical economic model into legal analysis, they do not all discard economic analysis and theory. Situated at the intersection of feminism, law, and economics, *Feminism Confronts Homo Economicus* will appeal to scholars and students of these disciplines as well as policy analysts and social theorists interested in family, education, labor, and welfare.

words for physical appearance: *Women in the Language and Society of Japan* Naoko Takemaru, 2010-04-19 Feminist critics have long considered language a primary vehicle for the transmission of sexist values in a society. This much-needed sociolinguistic critique examines the representation of women in traditional Japanese language and society. Derogatory and highly-sexualized terms are placed in historical context, and the progress of nonsexist language reform is reviewed. Central to this work are the individual voices of Japanese women who took part in a survey, expressing their candid thoughts and concerns regarding biased gender representations. In their own words, they give voice to the reality of being female within the constraints of a traditional--and sometimes misogynistic--language.
